Hello Larry,

As a member of CPA, and a passionate reader of the forums, I was always surprised to see how happy and loyal your customers were.

So I decided to go ahead and order a console for our 1974 Cessna 182, after reviewing the other products available on the market.

When I first phoned you, I was convinced that it would be very difficult for you to fulfill my wishes. Actually make that impossible!

I was very surprised that after a short moment to evaluate the content of my order, you were not only able to build and deliver a console in 4 days, but that you took the time to give me advice on the accessories that would make my life so much nicer! It was also very nice surprise to learn that my console would not be a "standard" one, but a customized one, matching the interior of our plane.

I have received the console, promptly on the day you said it would arrive. The only thing that made my day harder than usual was the way you build the parcel itself! It took me a good 10 minutes to open the box and remove all the layers of protection materials wrapped around the console!

The result is absolutely perfect. The quality of the materials, the way it is assembled and all the little details such as cushioning of the bottom of the console are far beyond what I was expecting.

The color match is also perfect. It is humbling for a journalist, used to work with high res pictures for our magazine, to see that the "Saircorp Eye for colors" is so much better trained than mine!

Please receive my thanks for a job fabulously well done and a product so well built. I cannot emphasize enough my satisfaction and can only recommend your products to anybody looking for the best value and quality on the market.

Sincerely,

Emmanuel Davidson
